Ben Bassler

Software Engineer

hello@benbaessler.com
Munich, Germany

About

I am a 20-year-old German-American software engineer with over 4 years of coding experience. Since 2021, I've been active in the Web3 space, working with technologies like DeFi, smart contract security, and on-chain social. I thrive in both autonomous and collaborative environments and am currently seeking a remote position, ideally as a front-end or full-stack engineer.

Work experience

Full-Stack Engineer   2022-2023
Morpho Labs

- Worked in a fast-paced, **agile** team environment.
- Revamped the analytics page using **React** and **Typescript**.
- Collaborated closely with designers.
- Built a Slack bot for large transaction notifications using **Tenderly**.

Projects

ShopConnect   GitHub

Browser extension that unlocks personalized deals for you while maintaining data privacy.
- Built during the ETHOnline 2023 hackathon and selected as a finalist.
- Developed with **JavaScript**, **Next.js**, and **Polygon ID**.

Social Bot   GitHub

A Discord bot for monitoring user activity on Lens Protocol.
- Built using **discord.js** and **GraphQL** listeners.
- Designed and developed a web dashboard for managing the bot using **Figma** and **Next.js**.
- Received a grant from Lens Protocol for the development of the project.

Cast Game   GitHub

A prediction game for Farcaster posts using Frames.
- Designed and developed the Farcaster Cast Action (frame) using **frog.fm**.
- Designed and developed the web app with **Next.js**.
- Launched on Base Sepolia testnet.
- Featured in **a podcast** about Farcaster builders.
